## OBJECTIVE

---

Self-driven Full-Stack Developer skilled in the MERN stack (MongoDB, Express.js, React.js, Node.js) with a focus on building scalable, user-centric web apps. Strong grasp of real-world project development, clean code practices, and modern tools like Redux, REST APIs, and Git. Passionate about learning, problem-solving, and delivering high-impact digital solutions in fast-paced environments.

## EDUCATION

---

|                                                                                              |           |
|----------------------------------------------------------------------------------------------|-----------|
| <b>Bachelor of Computer Science</b> , RGPV University<br>Laxmi Narayan College Of Technology | 2021-2025 |
| <b>Board of Higher Secondary Education</b> , MPBoard<br>Shri Hari Public School              | 2019-2020 |
| <b>Board of High School Secondary Education</b> , MP Board<br>Shri Hari Public School        | 2017-2018 |

## SKILLS

---

**Languages :-** JavaScript (ES6+), Typescript, Python, PHP, C, C++

**Web Technologies & Frameworks :-** HTML5, CSS3, React.js, Node.js, Express.js, Next.js Tailwind, Flask, Django, Angular.js, Angular 2+, Vue.js

**Cloud Platform :-** AWS

**Database :-** MongoDB, Mongoose, SQL

**Tools & Platforms :-** VS Code, GitHub, Git, Postman, NPM, Netlify, Vercel, Render

**Other Concepts :-** RESTful APIs, JWT Authentication, Responsive Design, MVC Architecture, Blockchain

## PROJECTS

---

### Street Food Hub

- **MERN Stack** Street Food Hub platform during a **hackathon**, featuring separate Vendor & Supplier panels with **Firestore OTP and email/password authentication** for secure access.
- Built **real-time** order management with MongoDB-backed **REST APIs**, allowing vendors to place delivery-slot-based orders and suppliers to update delivery status instantly.

### Graphical Password Authentication

- Graphical password is a one of the processes to provide our **security of digital device** or important information.
- The main motivation behind the graphical passwords is that the people can recall or recognize graphical objects easier.

### Trading Recommendation System for Investment

- The system's objective is to provide accurate predictions and actionable insights for traders and investors in their decision-making process.
- The project's core focus is on the development of an effective and efficient system that assists users in making well-informed investment decisions.

**Deloitte Australia Technology Job Simulation on Forage**

- Completed a virtual job simulation focused on software development and coding practices.
- Drafted a comprehensive proposal for a **real-time manufacturing status dashboard**, including scope, estimates, and timeline.

**CERTIFICATIONS**

| <b>Certificate of Completion – Technology Job Simulation</b><br>Completed a job simulation involving development and coding skills,<br>awarded by Deloitte Australia | 2025   <a href="#">Link</a> |

**ACHIEVEMENTS**

---

- **Top 20 – Street Food Hackathon (2025)** – Ranked among top 20 teams built a MERN stack app with Vendor & Supplier panels, Firebase OTP login, and real-time order management.
- **HackerRank – 5000+ Problem-Solving Points** – Achieved 5000+ points across multiple programming domains, showcasing strong problem-solving and algorithmic skills.
