OBJECTIVE

Self-driven Full-Stack Developer skilled in the MERN stack (MongoDB, Express.js, React.js, Node.js) with a focus on building scalable, user-centric web apps. Strong grasp of real-world project development, clean code practices, and modern tools like Redux, REST APIs, and Git. Passionate about learning, problem-solving, and delivering high-impact digital solutions in fast-paced environments.

EDUCATION

Bachelor of Computer Science , RGPV University Laxmi Narayan College Of Technology	2021-2025
Board of Higher Secondary Education , MPBoard Shri Hari Public School	2019-2020
Board of High School Secondary Education , MP Board Shri Hari Public School	2017-2018

SKILLS

Languages :- JavaScript (ES6+), Python, PHP, C, C++

Web Technologies & Frameworks :- HTML5, CSS3, React.js, Node.js, Express.js, Tailwind CSS, Bootstrap

Database :- MongoDB, Mongoose, SQL

Tools & Platforms :- VS Code, GitHub, Git, Postman, NPM, Netlify, Vercel, Render

Other Concepts :- RESTful APIs, JWT Authentication, Responsive Design, MVC Architecture, Blockchain

PROJECTS

Project 1: Blockchain Transaction Simulator (SecureChain Wallet)

Developed a browser-based blockchain simulator that mimics secure digital money transactions using JavaScript logic and hashing concepts. Ensured transaction integrity and immutability through a visual representation of block linking and hash recalculations. Designed a user-friendly wallet interface to simulate sending, receiving, and mining transactions.

Implemented basic encryption logic to showcase how tampering is detected in real-time.

Demonstrated core principles of decentralization and data validation to enhance educational value.

Project 2: College Placement Management System

Built a full-stack web application to manage student placements with role-based access for admin, students, and recruiters.

Integrated secure CRUD functionalities to manage student data, job postings, applications, and placement records..

Utilized MongoDB schema design for structured student and recruiter profiles and real-time updates.

React for frontend UI and Node.js/Express.js for RESTful API development and backend logic.
